### PLEASE READ

#### < <Permission to obtain Medical Records> >

Obtaining medical records is an important part of our research as it makes possible specific disease classification and verification.

If you have reported a cardiovascular condition/procedure on this questionnaire or in the past, we would appreciate your permission to obtain copies of your medical records.

If you have already given us permission in a previous questionnaire, please sign this consent again as there is a chance we have not yet sent for your medical records and your doctor may require a more recent signature.

*I give my permission to the UNC Alumni Heart Study to receive a copy of my medical records. This consent is limited to those conditions I have described and from doctors I have named in this or previous questionnaires.*
